

Publishing Test and Coverage Results to DTP

1. Run the following curl command to send a test report (report.xml) to DTP:

```
curl -k --user admin:admin -F file=@C:\Working\CAM\Calculator\Reports\report.xml https://localhost:8082/api/v2/dataCollector
```

2. **The file path is hard coded here for curl.** In the console output, you should see that the report was successfully uploaded to DTP.
3. Run the following curl command to send the coverage report (coverage.xml) to DTP.

```
curl -k --user admin:admin -F file=@C:\Working\CAM\Calculator\Reports\coverage.xml https://localhost:8082/api/v2/dataCollector
```

4. **The file path is hard coded here for curl.** In the console output, you should see that the report was successfully uploaded to DTP.
