

CTP 3.0.1

The following features and enhancements were added in this release:

New Workspace Widgets

We've added the following widgets to CTP.

- **Server Health Metrics:** Continuously monitor CPU utilization, disk space, and other metrics related to server health in this widget.
- **Top Servers by Health Metric:** Monitor the top five, 10, or 15 servers consuming the most resources according to a selected metric. Metrics include CPU utilization, disk space used, system memory, and threads.

See [Customizing Your Workspace](#) for details

Updated Azure Marketplace On-demand Image

We've added new widgets to the on-demand image available in the Azure Marketplace. Visit www.parasoft.com/service-virtualization-microsoft/ for additional information.
