

# Adding Repositories

To add a repository to one of the available servers:

1. In the Servers tab, select the server on which you want to add the new repository.
2. Click the **Create** icon.

3. Specify a name for the repository, then click the **Create** button. Note that the repository name cannot contain white spaces or non-alphanumeric characters, start with a digit, or use underscores as the first or last character.
