

Setting Up and Configuring the Calculator Example Application

1. Open a command window and run C:\Working\CAM\envSetup.bat to setup the environment.
2. Switch to %WORKING_DIR%\calculator.
3. Run mvn clean install to build the project.
4. Verify that the calculator project was successfully built. A target folder will be created in the project directory.

```
Command Prompt
C:\Working\CAM\calculator>mvn clean install
