

Reviewing Results in DTP

1. Log into DTP and choose **Report Center** from the **Administration** drop-down menu.
2. Choose **Projects> Filters** and click on the Calculator filter.
3. Verify that Calculator-All is selected in the Associated Coverage Image drop-down menu and that the both Run Configurations (one for the test results, and one for the coverage results) are present in the Analysis Settings section.

4. Click **Report Center** in the top title bar to return to the Report Center page.
5. Select the Calculator Project Filter and open the Code Coverage Dashboard created (see [Preparing DTP for Application Coverage](#)). The Dashboard should show the test result information and the collected coverage.

6. Click the Test Widget to open the Tests Explorer, which shows pass/fail information and other details associated with the tests that were run.
