

# Managing Component Instances

- [Filtering](#)
- [Editing Instance Details](#)
- [Cloning Instances](#)
- [Adding Instances](#)
- [Deleting Instances](#)
- [Input Validation](#)

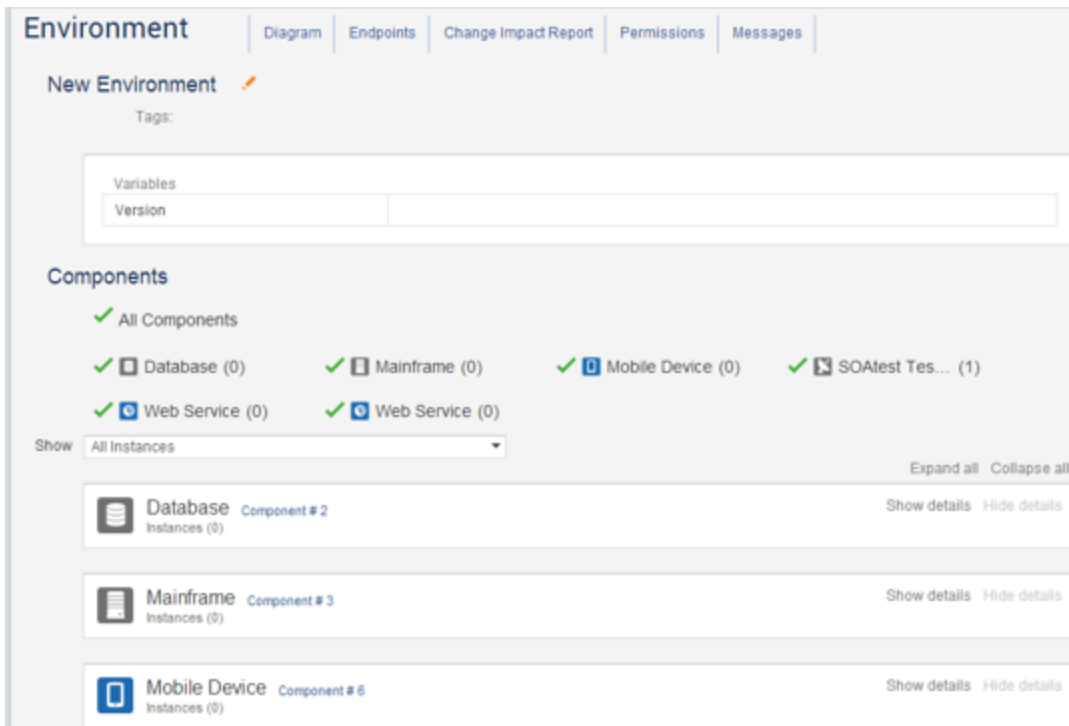

From the Manage Instance page, you can review and modify the settings for the instances available in the current environment. You can also add, delete, and clone instances.

To manage instance details:

1. Open the desired environment in Edit mode.
2. Click the **Instances** link at the top of the page.

The page that opens shows details for all components, component instances, and variables associated with the current environment. Environment variables are shown at the top of the page; components and component instances are shown below.

## Filtering

To show or hide details for specific components, use the filter buttons at the top of the page:

Components

- ✓ All Components
- ✓ Database (0)
- ✓ Mainframe (0)
- ✓ Mobile Device (0)
- ✓ SOA Test Telemetry (1)
- ✓ Web Service (0)
- ✓ Web Service (2)

Show

To control what set of component instances are shown, use the **Show** selector:

Components

- ✓ All Components
- ✓ Database (0)
- ✓ Mainframe (0)
- ✓ SOA Test Telemetry (1)
- ✓ Web Service (0)

Show

- All Instances
- Currently Selected on Diagram
- Environment Instance (Instance 1)
- Environment Instance (Instance 2)

## Editing Instance Details

Use the edit buttons to make an area editable.

Web Service Component # 5  
Web Service

- ▶ Variables
- ▶ Instances (2)

After you've made the desired changes, click the Save button at the top of the page.

If you want to see a modified value, rendered as plain text before you save the changes, click the check icon.

Web Service Component # 5 Show details  
Web Service

Variables

Key	Default value
Endpoint	http://localhost:8080/parabank/services/ParaBank1
WSDL	http://localhost:8080/parabank/services/ParaBank?wsdl

## Cloning Instances

If you want to clone any instances, click the Clone Instance button. You can then adjust the settings if desired.

## Web Service Component # 182

- ▶ Variables
- ▼ Instances (7)
- ▶ 1. Real Service
- ▶ 2. service w proxy

## Adding Instances

If you want to add a new instance "from scratch," click the New Instance button, then specify the instance settings.

## Mainframe Component # 3

- ▶ Variables
- ▶ Instances (0)

## Deleting Instances

If you want to remove an instance, click the related delete button (below), then confirm that you want to delete this instance.

- ▼ Instances (7)
- ▶ 1. Real Service
- ▶ 2. service w proxy
- ▶ 3. service w proxy - Copy2

## Input Validation

Input validation warnings will be shown if issues are detected (e.g., if changes are not yet saved or if an instance lacks a proper name).
