

Parasoft Menu Commands

The **Parasoft** menu provides the following commands:

- **Test Using [Favorite Configuration]:** Starts a test using the Test Configuration currently set as the Favorite Test Configuration.
- **Test History:** Starts a test based on the selected Test Configuration. Only the most recently-run Test Configurations are listed here.
- **Test Using:** Starts a test based on the selected Test Configuration. All available Test Configurations are listed here.
- **Test Configurations:** Opens the Test Configuration dialog, which lets you view, modify, and create Test Configurations. See [Configuring Test Configurations and Rules for Policies](#) for details.
- **Launch RuleWizard:** Opens RuleWizard, a tool for graphically or automatically creating custom static code analysis rules. See the Parasoft RuleWizard User's Guide for details.
- **Explore> Team Server:** Opens the Team Server browser dialog, which allows you to access, configure, and update the Test Configurations, rules, rule mapping files, and reports available on Team Server.
- **Explore> Team Server Reports:** Opens the report files that are available on Parasoft Team Server.
- **Explore> Report Center Reports:** Opens Parasoft DTP reports.
- **Import:** Imports the selected category of results that are available on Parasoft Team Server. See [Importing Results into the UI](#) for details.
- **Show View:** Opens GUI elements (such as the Quality Tasks view or Suppressions view) which are not currently visible. See [Views](#) for details.
- **Preferences:** Opens the Preferences dialog. See [C++test Configuring Overview](#) for details.
- **Wizards:** For C++test Visual Studio only, provides access to wizards that help you perform C++test operations such as adding test suites, adding user-defined stubs, importing C++test 6.x test cases and stubs, etc.
- **Test suite:** For C++test Visual Studio only, allows you to add, remove, enable, and disable test cases.
- **Support:** Provides several ways to contact the support team.
- **Help:** Opens the current User's Guide in the online help system and provides access to related Parasoft User's Guides.
- **Deactivate | Activate License:** Deactivates/activates a Parasoft LicenseServer license. See [Licensing](#) for details.
