

# Command Line Exit Codes

C++test uses the following exit codes:

Code	Meaning
0	Successful completion.
130	Command-line is malformed or refers to a resource that does not exist.
131	The workspace is busy.
134	A license problem has been encountered.
135	The process exited with an exception. Check error log.
0x1	Other violations. This exit code is only applicable when running <code>cpptestcli</code> with the <code>-fail</code> switch.
0x2	Static analysis violations. This exit code is only applicable when running <code>cpptestcli</code> with the <code>-fail</code> switch.
0x4	Unit test violations. This exit code is only applicable when running <code>cpptestcli</code> with the <code>-fail</code> switch.
0x8	Code review violations. This exit code is only applicable when running <code>cpptestcli</code> with the <code>-fail</code> switch.
