

Parasoft DTP Plugin for Eclipse

The general DTP Plugin and the DTP Plugin for C/C++ must both be installed:

1. Unpack the installation package in any directory.
2. Choose **Help> Install New Software** in the Eclipse menu bar.
3. Click **Add**.
4. Click **Archive** and choose `[INSTALL_DIR]\integration\eclipse\parasoft_dtp_plugin_c_cpp_<version>_eclipse.zip`.
5. Select the Parasoft plugins and complete the installation process. This will install both the DTP Plugin and the DTP Engine for C/C++ Plugin.

6. Restart Eclipse when prompted.
