

CAM Requirements and Installation

System Requirements

- Tomcat server 7 or 8.
- Jtest or dotTEST DTP Engine version 10.2.3 or later.

Installation

1. Download CAM (`cam.war`) from the [Parasoft Marketplace](#).
2. Deploy the `cam.war` file to your Tomcat application server to install CAM.
Diagnostic information that is collected when CAM is working will be stored in `/logs/cam.log` and `/logs/logs/*` in the Tomcat directory where CAM is deployed.
3. Open CAM at the following URL in a browser to verify the installation: [http://\[your-Tomcat-host:port\]/cam](http://[your-Tomcat-host:port]/cam).
