

You can add frequently used Test Configurations to the Favorites menu for quick and easy access from the Parasoft tab in the IDE's main menu.

1. Click **Parasoft** in the menu bar and choose **Preferences** (Eclipse), **Options** (NetBeans) or **Settings** (IntelliJ). Then select **Configuration**. You can also choose **Parasoft> Favorites and Run History> Test Configuration**.

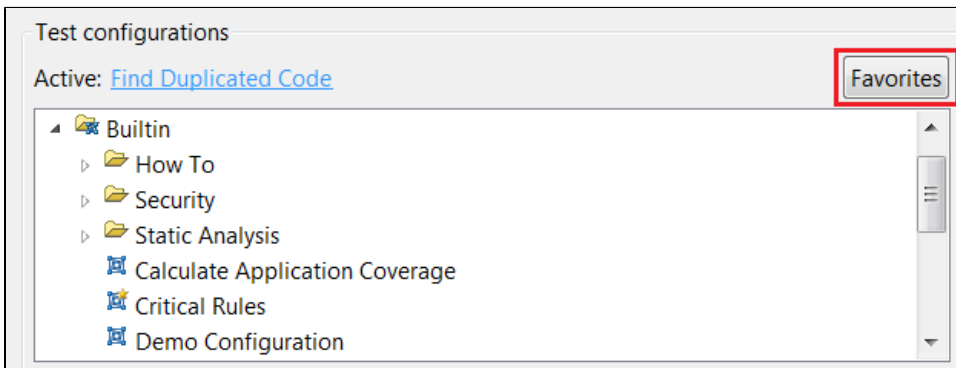

2. Navigate to the desired Test Configuration.
3. Right-click the Test Configuration and choose **Add to Favorites**.

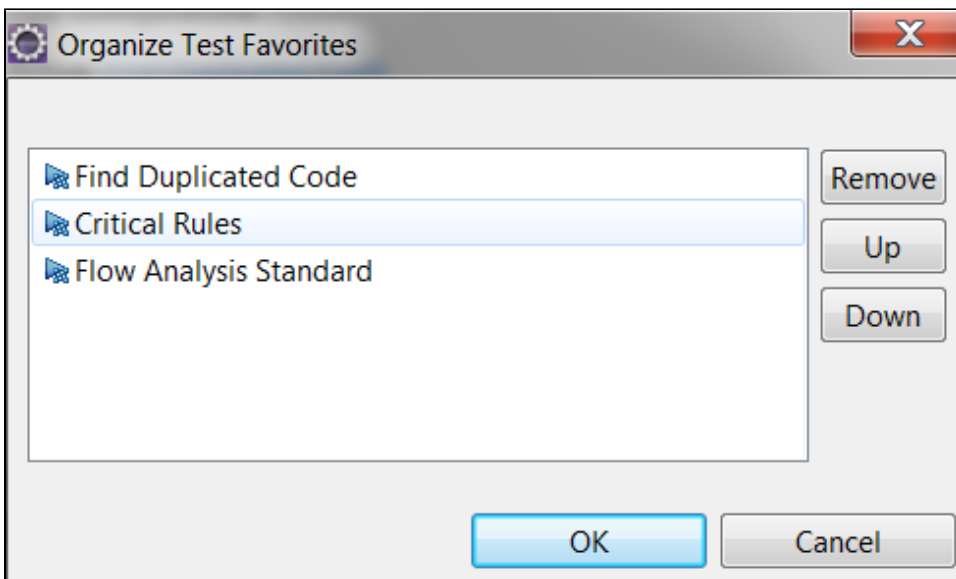

## Managing Favorites

You can remove Test Configurations from the Favorites menu and reorder the configurations from the Organize Test Favorites overlay.

1. Open the Configurations settings panel and click **Favorites**.

2. Select a Test Configuration and use the **Remove**, **Up**, or **Down** buttons to manage the configurations.

3. Click **OK** when finished.
