

Logging In

To start using CTP, browse to your organization's CTP URL, then enter your username and password.

The image shows a login form for Parasoft. At the top center is the Parasoft logo, which consists of a blue square icon with a white 'P' and the word 'PARASOFT' in a bold, black, sans-serif font. Below the logo are two input fields: 'User Name' and 'Password'. The 'User Name' field is a simple white rectangle with a thin gray border. The 'Password' field is a white rectangle with a thin gray border and a small eye icon on the right side, indicating it can be toggled between visible and hidden. Below the password field is a checkbox labeled 'Log me in automatically'. At the bottom left of the form is a link that says 'Can't access your account?'. At the bottom right is a dark blue button with the text 'Log In' in white.

If your CTP license has not yet been set, enter it in the license page that opens.

Tip—Installing new license keys to License Server

If you need to add new license keys and your License Server is on the same host as CTP, you can do it directly from CTP. Just choose **Administration > License Configuration**, then copy your license key (provided by your Parasoft representative) into the Add New License area and click the **Add License** button. Once the key is processed, it will be added to the list in the Installed Licenses area.

If you don't see the Add New License area, be sure that you have the network license's Host name field set to localhost.
