

Logging In

Starting CTP for the First Time

Open a browser tab and navigate to the host and port where DTP is deployed. You will be prompted to configure the license, as well as the database. See [Configuring the License and Database](#) for details.

You will also be prompted to configure the security settings. The security configuration is facilitated by the PSTSec component. Refer to [Installing Parasoft User Administration](#) for details.

Authentication

1. If CTP has been configured to authenticate user access (see [Installing Parasoft User Administration](#)), open a browser tab and navigate to the host and port where DTP is deployed.
2. Enter your Parasoft username and password.

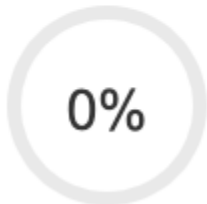

The image shows a login form for Parasoft. At the top left is the Parasoft logo, which consists of a blue square icon with a white grid pattern followed by the word "PARASOFT" in a bold, black, sans-serif font. Below the logo, the form is set against a light blue background. It features two input fields: "User Name" and "Password". The "User Name" field is a white rectangle with a thin blue border and a small key icon on the right side. The "Password" field is a white rectangle with a thin blue border. Below the "Password" field, there is a checkbox labeled "Log me in automatically". At the bottom left of the form, there is a link that says "Can't access your account?". At the bottom right, there is a dark blue button with the text "Log In" in white.

If anonymous access has been enabled, you will be able to browse CTP interfaces and assets without logging in.
