

# Viewing Details about Analysis Findings

The Finding Details view provides a contextual view of individual findings, along with details, such as flow paths or an exception stack trace, about the selected finding.

To access these details:

- In the Findings view, right-click the finding you want more information about, then choose **Show in Finding Details**.

- Click a finding in the Finding Details view to highlight it in the code editor. Start and stop points for flow analysis and unit testing paths will also be highlighted.
