

# Plugin for IntelliJ IDEA

The general Parasoft Plugin and the Jtest Plugin must both be installed:

1. Unpack the installation package in any directory.
2. Choose **File> Settings** in the IntelliJ menu bar, then select **Plugins**.
3. Click **Install plugins from disk...** and choose [INSTALL\_DIR]\integration\intellij\parasoft\_plugin\_<version>\_intellij.zip.

4. Click **OK** to complete the Parasoft Plugin installation and restart IntelliJ.

5. Repeat the above process—this time, choosing **jtest\_plugin\_<version>\_intellij.zip** after clicking **Install plugins from disk...** This will install the Jtest Plugin for IntelliJ.
