

10.3.1

In this minor release, we focused on updating and enhancing existing functionality, including:

Improved Continuous Quality Assistant (CQA) performance (see [Continuous Static Analysis](#)).

Improved Unit Test Assistant (UTA) variable presentation (see [Unit Test Assistant Overview](#)).

- Improved Flow Analysis execution
- Performance improvements for collecting application coverage
- Extended support for Gradle Android projects
- New test configuration for PCI Data Security Standard 3.2 (see [Built-in Test Configurations](#)).

Resolved FRs and PRs

ID	Description
