

Adding a Custom Graphic to the Navigation Bar

You can add a graphic to the navigation bar. This enables you to brand your DTP installation with a company or team logo.

Only PNGs are supported and must be named custom-logo.png. The graphic will be scaled to 300 pixels wide by 35 pixels tall.

Replace the existing custom-logo.png placeholder file in the [DTP_HOME]/tomcat/webapps/grs/assets/ directory with the new graphic file. The file must be named custom-logo.png.
