

Integrating with CI Tools

The Parasoft Findings plug-ins enable you to visualize test execution and code analysis results from Parasoft tools in your continuous integration system interface. The plug-ins are available for the following CI systems:

- Bamboo - see [Parasoft Findings for Bamboo](#)
- Jenkins - see [Parasoft Findings for Jenkins](#)
- TeamCity - see [Parasoft Findings for TeamCity](#)
- Visual Studio Team Services - see [Parasoft Findings for Visual Studio Team Services](#)
